

BCN Provides Technology TLC for Senior Living Communities

BCN IN HEALTHCARE

Exceptional patient care demands security and above all, reliability. From hospital networks to multi-location medical practices, BCN designs and deploys fast, always-on network solutions with advanced security and built-in data redundancy.

With a custom-designed network powered by the world's leading partners, BCN equips healthcare organizations with the connectivity and technology to provide better care and stay HIPAA compliant.

THE BCN SOLUTION

- Dedicated Internet
- POTS (Analog Voice Service)

A Shared Commitment to Excellence

This multi-location customer owns and operates a variety of senior living communities across the country. Their mission is to provide those who live within them with the opportunities to enjoy life to the fullest.

When they came to BCN this customer was managing multiple telecommunication network providers and points of contact, and thousands of monthly invoices. All time better spent focused on the health and wellbeing of their residents and the future of their business. They needed one technology provider with the ability to consolidate their current broadband services across all communities to deliver a simplified technology infrastructure. They also wanted a team that could guide them toward emerging technologies to fuel future growth and enable their teams to continue to deliver on their mission.

Their search led them to a trusted agent partner for assistance who knew BCN was the answer based on our expertise in multi-location deployments, our incredibly wide range of broadband service suppliers, as well as the benefits of a BCN consolidated monthly billing platform.

BCN created a customized technology solution that began with an in-depth qualification and discovery process, the results of which indicated potential monthly savings of over \$12,000.

Moreover, our expertise in crafting solutions that include traditional and advanced technologies meant we could address all of their needs - from traditional voice to diverse forms of Internet connectivity.

The operational efficiencies of working with just one provider, with one point of contact for service and support, and one customized monthly invoice means more time spent focused on their residents and not their technology infrastructure.

WE ARE BCN

A communication technology solutions provider with the flexibility and experience to address every need uniquely. Creating tailored solutions based on the portfolios of 75+ wholesale network & technology partners.
